

Undergraduates Enrolling in Graduate Level Courses

The College of Engineering allows undergraduate students to enroll in graduate courses **in compliance with the University's policy**. Students must meet the following requirements:

- senior standing (in terms of credits, not in terms of years at Villanova),
- minimum of 3.0 GPA,
- appropriate approvals (advisor, course instructor, chair, and Associate Dean for Academic Affairs).

Mechanical, Electrical, and Computer Engineering students may “double-count” up to nine credits permitting some graduate courses completed as an undergraduate to be applied toward the completion of both the bachelor’s degree and the master’s degree.
