AST 2120: Sun and Stars

A technical study of the Sun and other stars; their internal constitutions and atmospheres, life cycles and evolutionary processes, memberships in groups, the radiations they produce, and the manner in which astronomers quantify their characteristics.

**Credits:** 3

**Prerequisites:**
MAT 1310 or MAT 1320 or MAT 1330 or MAT 1400 or MAT 1500

**Program:** Astrophysics and Planetary Science
