

Naval Science Program and Minor (Navy ROTC)

Executive Officer of NROTC: CDR Jerod Konowal, USN
Telephone: 610-490-7380

About

Villanova University, in a long-standing relationship with the United States Navy, maintains one of approximately 60 Naval Reserve Officers Training Corps units in the United States. The objective of the Unit is to educate prospective officers for the Navy and Marine Corps. Reserve commissions as Ensign or 2nd Lieutenant are awarded upon successful completion of prescribed naval science courses and graduation from the University. These commissioned officers will serve on active duty for a period of four to nine years, depending upon choice of warfare specialty.

All Scholarship and College Program students may select any major at the University. Midshipmen at Villanova study in a wide variety of majors in engineering, arts, sciences, business, and nursing. Detailed NROTC information may be obtained from the Naval Science Office, Room 103, John Barry Hall.

Program: Naval Science (Navy ROTC)

Type: Program

MINOR: Naval Science (19 credits)

Program notes:

- Students need to take 8 instances of NS 0100 - Naval Professional Lab (meets once weekly, taken each semester).
- Courses that fulfill minor requirements may be used to fulfill other requirements (i.e., primary major, core curriculum, minors, concentrations, or free electives).
